## ABEMACICLIB

### Name of your medication

Generic name — abemaciclib (uh-BEH-muh-SY-klib)  
Brand name — Verzenio™ (ver-ZEH-nee-oh)

### Common uses

Abemaciclib is used to treat adult patients with hormone receptor (HR)–positive, human epidermal growth factor receptor 2 (HER2)–negative breast cancer.

Abemaciclib may also be used for other treatments.

### Dose and schedule

Taking abemaciclib as instructed is important to allow your treatment to be as effective as possible, so here are some key points to remember.

- Your dose may vary, but the usual dose of abemaciclib is 150 milligrams (150 mg) to be taken by mouth twice daily when given in combination with fulvestrant or an aromatase inhibitor. When abemaciclib is given alone as monotherapy, the usual dose is 200 milligrams (200 mg) taken by mouth twice daily. The dose may be adjusted by your care provider based upon your individual needs.
- Abemaciclib can be taken with or without food, but at the same times each day.
- Abemaciclib should be taken whole and not crushed, cut, or dissolved. If you are unable to swallow abemaciclib, talk to your care provider or pharmacist for possible options.
- If you miss a dose of abemaciclib, **do not** take an extra dose or two doses at one time. Simply take your next dose at the regularly scheduled time.
- Be sure to write down if you miss a dose and let your care provider know about any missed doses.

### Drug and food interactions

- Abemaciclib has the potential for drug interactions. Inform your care provider of all prescription medications, over-the-counter medications, vitamins, and herbal products that you are taking.
- Grapefruit or grapefruit juice may interact with abemaciclib. Avoid eating or drinking these during your treatment with abemaciclib.
- Talk with your care provider or pharmacist before taking new medications or supplements, or receiving any vaccines.

## ABEMACICLIB

### Storage and handling

Handle abemaciclib with care. Just like when chemotherapy is given into the vein, this drug can be toxic, and exposure of the drug to others should be limited.

- Store abemaciclib at room temperature (68°F–77°F) in a dry location away from light.
- Keep abemaciclib out of reach of children and pets.
- Leave abemaciclib in the provided packaging until it is ready to be taken.
- Whenever possible, give abemaciclib to yourself and follow the steps below. If a family member, friend, or caregiver needs to give the abemaciclib to you, they also need to follow these steps.
  1. Wash hands with soap and water.
  2. Put on gloves to avoid touching the medication. (Gloves are not necessary if you give the drug to yourself.)
  3. Gently transfer the abemaciclib from its package to a small medicine or other disposable cup.
  4. Administer the medicine immediately by mouth with water.
  5. Remove gloves and do not use them for anything else.
  6. Throw gloves and medicine cup in household trash.
  7. Wash hands with soap and water.
- If a daily pill box or pill reminder will be used, contact your care team before using:
  - The person filling the box or reminder should wear gloves (gloves are not necessary if you are filling the box or reminder).
  - When empty, the box or reminder should be washed with soap and water before refilling. Be sure to wash hands with soap and water after the task is complete, whether or not gloves are worn
- If you have any unused abemaciclib, **do not** throw it in the trash and **do not** flush it down the sink or toilet. Talk to your care provider or pharmacist about proper disposal of abemaciclib.
- If you are traveling, put your abemaciclib's packaging in a sealed plastic bag. Ask your pharmacist if any additional travel precautions are needed.

## ABEMACICLIB

Possible Side Effect	Management
<b>Decreased platelet count and increased risk of bleeding</b>	<p>Your platelets should be monitored by a simple blood test. When they are low, you may bruise or bleed more easily than usual.</p> <ul style="list-style-type: none"><li>• Use caution to avoid bruises, cuts, or burns.</li><li>• Blow your nose gently, and do not pick your nose.</li><li>• Brush your teeth gently with a soft toothbrush, and maintain good oral hygiene.</li><li>• When shaving, use an electronic razor instead of razor blades.</li><li>• Use a nail file instead of nail clippers.</li></ul> <p>Call your care provider if you have bleeding that won't stop. Examples include the following:</p> <ul style="list-style-type: none"><li>• A bloody nose that bleeds for more than five minutes despite pressure</li><li>• A cut that continues to ooze despite pressure</li><li>• Gums that bleed excessively when you floss or brush</li></ul> <p>Seek medical help immediately if you experience any severe headaches, observe blood in your urine or stool, cough up blood, or experience prolonged and uncontrollable bleeding.</p> <p><b>You may need to take a break or “hold” your medication for medical or dental procedures. Talk to your care provider or dentist before any scheduled procedures.</b></p>

### Serious side effects of abemaciclib

- Abemaciclib can increase your risk of having a blood clot. Seek immediate medical attention if you have sudden swelling in an arm or leg, have chest pain, or have trouble breathing.
- Abemaciclib may cause your lung tissue to scar, which is called interstitial lung disease. Call your care team if you are feeling short of breath, have a fever, or have a lasting dry cough.

If you experience ANY uncontrolled side effect, call your physician or healthcare center immediately:

(INSTITUTIONAL CONTACT INFO)

### Handling body fluids and waste

Abemaciclib remains in your body for several days after it is taken, so some of the drug may be present in urine, stool, sweat, or vomit. Once you have started to take abemaciclib, it is important to follow the instructions below every day for as long as your treatment lasts. This will keep yourself, loved ones, and the environment as safe as possible.

- Pregnant women should avoid touching anything that may be soiled with body fluids from the patient.
- Toilet and septic systems
  - You may use the same toilet, septic tank, and/or sewer that you usually use. If you have a low-flow toilet, close the lid and flush twice to ensure that all waste has been discarded.
  - If the toilet or toilet seat becomes soiled with urine, stool, or vomit, clean the surfaces before other people use the toilet.
  - Wash hands with soap and water after using the toilet.

## ABEMACICLIB

- If you need a bedpan, be sure your caregiver knows to wear gloves to assist with cleanup and to wash the bedpan with soap and water every day.
- If you do not have good control of bladder or bowels, use a disposable pad with a plastic back, a diaper, or a sheet to absorb body waste.
- Wash any skin that has been exposed to body waste or abemaciclib with soap and water.
- Linens or clothing that are soiled with body fluids or body waste should be washed separately from other linens and clothing. If you do not have a washer, place the soiled linens in a plastic bag until they can be washed.
- Wash hands with soap and water after touching linens or clothing that may be soiled with body fluids.

### Pregnancy, sexual activity, and contraception

- Women should not become pregnant and men should not get a partner pregnant while taking abemaciclib. Women of childbearing age and potential should use effective contraception during therapy and for a minimum of 3 weeks after the last dose of abemaciclib. Men of reproductive age and potential should use effective contraception during therapy with abemaciclib.
- Abemaciclib may impair fertility in males of reproductive potential.
- Effective contraception could include 1 or more of the following: oral contraceptive, barrier methods, etc.
- Do not breastfeed while taking abemaciclib and for 3 weeks after the last dose of abemaciclib.
- Please inform your care provider if you become pregnant.
- It is safe to hug and kiss. Special precautions may be needed for sexual activity while on abemaciclib, and you are encouraged to ask your care provider.

### Obtaining medication

- Talk with your care provider about the process for obtaining your abemaciclib.
